CAREER OBJECTIVE

Product-focused Full Stack Developer & Technical Lead with experience building scalable fintech, B2B, blockchain, and real-time platforms across web and mobile ecosystems.

Skilled in designing payment systems, transaction workflows, distributed backend architectures, and production-grade applications with a focus on scalability, clean architecture, and end-to-end delivery.

Experienced with FastAPI, Django, React, Next.js, React Native, PostgreSQL, CockroachDB, Redis, Kafka, and GCP, including architecture, implementation, deployment, and production readiness.

CORE SKILLS

Frontend

React.js • Next.js • Tailwind CSS • React Native (Android & iOS) • TypeScript • JavaScript

Backend

FastAPI • Django • Django REST Framework • Node.js • REST APIs • Webhooks • Async Processing

Architecture

Microservices Architecture • Distributed Systems • Event-Driven Systems • System Design • API Architecture

FinTech & Payments

Payment Gateway Integrations • Transaction Systems • Financial Data Handling • Cross-border Payment Flows • Ledger & Accounting Systems

Blockchain

Sui Network • Stellar • Move Language • Wallet Integrations

•Token Transfers • NFT Workflows • Smart Contract Concepts

AI & Automation

OpenAI API • ChatGPT Integrations • AI-powered Workflows • OCR-based Processing

Database

PostgreSQL • CockroachDB • Redis • Firebase

Cloud & DevOps

GCP • Docker • Firebase Hosting • CI/CD Pipelines • Cloud Deployment • Infrastructure Setup

Tools

Git • GitHub • Postman • JWT Authentication • Vercel

Mobile & Deployment

React Native App Development • Play Store Deployment • App Store Deployment • Production Release Management

PROFESSIONAL EXPERIENCE

Full Stack Developer & Technical Lead

May 2026 – Present

MONEYVERSE PTE. LTD. | Bengaluru, Karnataka

- Designed and developed scalable fintech and payment platforms across web and mobile ecosystems
- Built backend systems for payment processing, transaction handling, and financial workflows
- Developed scalable APIs using FastAPI, Django, and distributed backend patterns
- Worked on microservices architecture and cloud-ready backend systems
- Built production-ready applications using React, Next.js, and React Native
- Integrated external payment systems and API-driven transaction workflows
- Designed financial data handling systems using PostgreSQL and CockroachDB
- Worked on blockchain-based transaction systems involving Sui and Stellar
- Managed end-to-end deployment including cloud hosting, Play Store publishing, and App Store deployment
- Collaborated with product and business teams to align technical execution with business requirements
- Led technical planning, architecture decisions, and scalable backend implementation

FEATURED PROJECTS

TradEdge Financial Platform

- Architecting a financial operating system for traders using Xflow APIs
- Designed payment, receivables, and compliance-oriented backend systems
- Planned scalable microservices architecture and cloud deployment strategy
- Worked on cross-border transaction workflows and backend integrations

Technologies: FastAPI, PostgreSQL, GCP, React, Microservices

B2B Payments Platform

- Built a scalable B2B payment platform using external API integrations
- Developed transaction orchestration and secure payment workflows
- Designed backend services for reliable payment processing

Technologies: FastAPI, PostgreSQL, API Integrations, React

Real-Time Booking Platform

- Developed booking and availability systems with concurrent transaction handling
- Built scalable backend workflows and responsive frontend interfaces

Technologies: React, Next.js, PostgreSQL, Node.js

Blockchain & Wallet Platform

- Built blockchain-based wallet and token transfer workflows using Sui and Stellar
- Worked on decentralized transaction flows and backend integrations

Technologies: Sui, Stellar, FastAPI, React

EDUCATION

Bachelor of Technology (EEE) | 2022

Aditya Engineering College, Surampalem

CGPA: 7.2

TECHNICAL HIGHLIGHTS

- Built and deployed end-to-end applications across web and mobile platforms
- Experience designing scalable backend architectures and distributed systems
- Hands-on expertise in fintech systems, payment platforms, and transaction workflows
- Strong understanding of API integrations and cloud-based deployments
- Experience managing complete product delivery from architecture to production deployment

Declaration

I solemnly confirm that all details provided herein are true to the best of my knowledge and belief. I commit to conducting myself in a manner that upholds the dignity of the organization and highlights me as a valuable and resourceful asset.

Manikrishna
