CAREER OBJECTIVE

Product-focused Full Stack Developer & Team Lead with experience building scalable fintech and real-time platforms across web and mobile ecosystems.

Skilled in designing payment systems, transaction workflows, distributed backend systems, and production-grade applications with a focus on scalability, and end-to-end delivery.

Experienced with REST APIs, Django, React, Next.js, React Native, PostgreSQL, CockroachDB, Redis, Kafka, and GCP, including implementation, deployment, and production readiness.

CORE SKILLS

Frontend

React.js • Next.js • Tailwind CSS • React Native (Android & iOS) • TypeScript • JavaScript

Backend

REST APIs • Django • Django REST Framework • Node.js • Webhooks • Async Processing • Kafka

FinTech & Payments

Payment Gateway Integrations • Transaction Systems • Financial Data Handling

Database

PostgreSQL • CockroachDB • Redis • Firebase

Cloud & DevOps

GCP • Docker • Firebase Hosting • CI/CD Pipelines • Cloud Deployment • Infrastructure Setup

Tools

Git • GitHub • Postman • JWT Authentication • Vercel

Mobile & Deployment

React Native App Development • Play Store Deployment

• Production Release Management

PROFESSIONAL EXPERIENCE

Full Stack Developer & Team Lead

April 2024 – Present

Gowdanar Technologies Pvt Ltd. | Bengaluru, Karnataka

- Designed and developed scalable fintech lending platforms across web and mobile applications.
- Developed backend systems for payment processing, wallet operations, and financial transaction workflows.
- Developed scalable APIs using REST APIs, Django, and distributed backend patterns
- Worked on microservices architecture and cloud-ready backend systems
- Built production-ready applications using React, Next.js, and React Native
- Integrated external payment systems and API-driven transaction workflows
- Designed financial data handling systems using PostgreSQL and CockroachDB
- Managed end-to-end deployment including cloud hosting and Play Store deployment

FEATURED PROJECTS

P2P Lending Platform

Role: Team Lead

Duration: 1 Year

- Led the development of a peer-to-peer lending platform connecting lenders and borrowers.

- Developed modules for onboarding, loan requests, repayment tracking, wallet management, notifications, and transaction history.
- Worked on REST APIs development and frontend-backend integration in a microservices architecture.
- Coordinated team tasks, sprint activities, production support, and feature releases.
- Integrated payment gateway services for transaction processing and wallet operations.

Technologies: Python, Django, React Native, Next.js, REST APIs, Microservices, PostgreSQL, Razorpay, HTML, CSS, JavaScript, Docker, GCP

Institutional Digital Lending Platform

Role: Team Lead

Duration: 1 Year

- Led the development of an institutional digital lending platform for banks and financial institutions.
- Implemented dynamic loan product and workflow configuration with instant reflection in borrower journeys.
- Developed complete loan lifecycle features including loan processing, repayments, foreclosure, and loan extension.
- Built an internal scoring and risk assessment system as an alternative to external credit scoring providers.
- Developed branch management, employee onboarding, and role-based access control (RBAC) with module-based permissions and secure access management.
- Developed bank-side and borrower-side transaction management with wallet operations and Razorpay integration.
- Managed requirement analysis, task allocation, team coordination, production support, and Agile sprint delivery.

Technologies: Python, Django, React Native, Next.js, REST APIs, Microservices Architecture, CockroachDB, Kafka, Redis, Razorpay, HTML, CSS, JavaScript, Docker, GCP

EDUCATION

Bachelor of Technology (ECE) | 2023

Aditya Engineering College, Surampalem

CGPA: 6.8

TECHNICAL HIGHLIGHTS

- Built and deployed end-to-end applications across web and mobile platforms
- Experience designing scalable backend architectures and distributed systems
- Hands-on expertise in fintech systems, payment platforms, and transaction workflows
- Strong understanding of API integrations and cloud-based deployments
- Managed the development and delivery of fintech lending products from requirement analysis to production deployment.

Declaration

I solemnly confirm that all details provided herein are true to the best of my knowledge and belief. I commit to conducting myself in a manner that upholds the dignity of the organization and highlights me as a valuable and resourceful asset.
